Math Bridge Project (MBP)

We are pleased to announce **the 2nd year of the Math Bridge Project** (MBP, which is a co-promoted series of events by two of our state mathematics organizations, the Wisconsin Mathematics Council (WMC) and the Wisconsin Section of the Mathematical Association of America (MAA). In 2024-25 we have four events planned. **All events will be held on Wednesdays on Zoom from 4:00 – 5:00 p.m.**

This project was developed to bring members of both organizations together to share the great work that each of them are doing related to PK-16 mathematics and mathematics education in the state of Wisconsin. **Each event will feature two speakers**, one representing WI Section MAA and the other representing WMC, speaking on a similar topic or theme.

The WI Section MAA speaker will focus on sharing their work related to an area of mathematics they are currently focused on or conducting research on themselves, or with undergraduate students. The WMC speaker will share their current focus or research related to a topic in their mathematics classroom or in mathematics education. **The idea is bringing together speakers and audiences from both organizations to better learn from each other.**

Scan the QR code to sign up or go to: <https://www.surveymonkey.com/r/7Y2GDSV> . By doing so, you'll receive information about the events and the zoom link. For more information contact Erick Hofacker at: Erick.B.Hofacker@uwrf.edu

Fall 2024 Events

September 25th, 2024

Theme: Developing & working with student teams for Math Modeling Contests

October 23rd, 2024

Theme: Calculus & Analysis, in and out of the classroom

Spring 2025 Events

January 22nd, 2025

Theme: Probability & Actuary, in and out of the classroom

February 19th, 2025

Theme: Support for diverse learners of mathematics
